

General recommendations

When installing the wash basins, please respect the following points:

1. For the correct installation, please place the special plastic ring between the waste and the basin as detailed in the sheet accompanying each item) , and please avoid the usage of electrical screwers during installation.
2. For the correct and safe installation: do not use acetic silicone for fixing the basin to the top.
3. For the correct use , please observe the care instructions you find in the product sheet such as cleaning with water and neutral soap, the recommendation to not use acid or corrosive/abrasive cleaners or sponges.
4. For the proper use of the wash basin, please pay attention that any heavy or hard objects fall onto it (i.e.: tumbler, razors..) which can cause breakages or partial damages to the basin's surface.
